Product Spotlight - US4 Ultrasonic Sensor

Montalvo's US4 Ultrasonic sensor gives you more advanced roll diameter detection with superior accuracy and reliability, while still being one of the easiest sensors to install and calibrate.

Built in temperature compensation combined with an IP67 rating ensures a quality signal no matter the environment.

Additional features include:

- Easy installation
- Push button calibration
- 0-10V or 4-20mA Output
- Extended sensing ranges

A quality and dependable sensor allows your machine to be more productive by giving your controller the information it needs to properly control tension. An inaccurate sensor can mean the difference between profit and scrap. Utilize the US4 today, a small but critical piece to your tension control.
